TYPES OF PACKAGING SERVICES

1. Soft Packaging
2. Vacuum/VCI (Anti Corrosive) Packaging
3. Thermoshrink Packaging

TYPES OF PACKAGING SERVICES

Soft Packaging:

Soft packaging is carried out using Bubble Sheet, Stretch Film it's most suitable for Short distance & Domestic Packaging

TYPES OF PACKAGING SERVICES

Sea Worthy Vacuum/VCI Packaging (Anti Corrosion):

- A. Moisture is prime cause of corrosion on metal products
- B. To Avoid Oiling & Greasing use VCI Paper and VCI Poly packaging material .
- C. Degreasing & Removing of oil from components is expensive and time consuming.
- D. VCI (Volatile Corrosion Inhibitors) Poly film leaves no powdery residues or fibre on the metal components.
- E. VCI (Volatile Corrosion Inhibitors) Poly Films does not contain Nitrites & & Phosphates.
- F. Aluminium Barrier Foil Packaging material provide better Moisture Barrier properties compared to any other similar material.
- G. Here the product is packed in air sucked out and the package is sealed.

VACUUM/VCI PACKAGING PICTURES

THERMOSHRINK PACKAGING

We provide Multi-wrapping services on site for all types of cargo. Multi-wrapping is a great solution when the product is oddly shaped or you are doing a low volume of any one size package.

Applications:

The result of Multi-wrapping is a very tight wrap, conforming to the product shape so that your cargo is sealed properly for transport. Multi-wrapping will protect your cargo against any outside damage.

- The measurement of Cargo to be wrapped is taken first.
- Multi wrap foil is cut according to the size needed.

THERMOSHRINK PACKAGING

- The foil is covered on the cargo.
- Then the flame gun is used to heat up the foil.
- At the time of heating the flame gun to be kept 30 cms away from foil.
- Once the heat is affected on foil it starts shrinking.
- The shrinking of the area should not take more than 40 seconds.

Advantages:

- Multi-wrap protects and groups products during shipment. The shrink wrap film is plastic and, when heated, it shrinks and conforms to the products' shapes to protect them from dirt, moisture, and damage in transport.
- Multi-wrap protects against weather damage, it can withstand difficult weather conditions.

.

THERMOSHRINK PACKAGING

- Multi-wrapping will not move or chafe during transportation or storage.
- We can apply multi-wrapping without considering the size, shape or weight of a product. It goes well for almost all of the products and that's the reason why it is one of the best choices for manufacturing companies.

LASHING ACTIVITIES

We do Lashing services for the Cargo that needs to be shipped to different parts of the GLOBE. Lashing plays a vital role in cargo shipments and it's as important as Packing. We do Lashing in both Lashing Belts, Steel Wire Ropes.
